Physics 3400B
Introduction to Thermal Physics
Course Information: Winter 2019

Course Description (from the UWO Calendar): Thermodynamics applied to classical and quantum systems. Thermodynamic laws, interactions, engines, phase transformations of pure substances, Boltzmann statistics, simple quantum systems.

Prerequisites: Physics 2101A/B and Physics 2102A/B, or Physics 2128A/B and Physics 2129A/B; Physics 2110A/B or the former Physics 2900E.

3 lecture hours, 0.5 course.

Note: Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

Instructor: Dr. John de Bruyn

email: debruyen@uwo.ca
Phone: 519-661-2111 ext. 86430
Office: PAB 230

The simplest way to reach me outside of normal class hours is by email. Please contact me using your @uwo.ca email address. I cannot guarantee that I will either receive or respond to email messages that come from an off-campus address.

Office hours: T Th 10:30-11:30.

I will make every effort to be in my office during these office hours. In fact, though, I am usually in my office, and you are welcome to drop in to discuss the course – or anything else – any time I am free.

Lecture times: MWF 11:30-12:30, PAB 106

Owl: https://owl.uwo.ca/portal (log in with your UWO username and password)

I will be using Owl to post course materials, assignments, and grades. Please check the site often!

Textbook: An Introduction to Thermal Physics by Daniel V. Schroeder (Addison-Wesley, 2000)

This textbook can be purchased at the UWO Bookstore. You may find less expensive versions from online booksellers. Note that some paperback editions are missing some chapters, so be careful.

I expect to use material from other textbooks as well, including Fundamentals of Statistical and Thermal Physics, by F. Reif, and Thermal Physics by C. Kittel, but you needn’t purchase these books. Additional
course materials will be distributed in class or made available on Owl as needed.

Please contact the course instructor if you require material in an alternate format or if you require any other arrangements to make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 661-2111 x 82147 for any issues or questions regarding accommodation.

Course Content: Here is my best guess as to what we will cover (and in what order) over the term, although there may not be time to do all of these things. Some of these topics are not covered in the course text, but supplementary readings will be provided as required.

- Review of the laws of thermodynamics, temperature, entropy, and the like
- Free energy and Chemical Thermodynamics (Schroeder, Ch. 5)
- Boltzmann Statistics (Schroeder, Ch. 6)
- Quantum Statistics (Schroeder, Ch. 7)
- Phase equilibrium and phase transitions (Reif, Ch. 8)
- Transport processes (Reif, Ch. 12)
- Irreversible processes and fluctuations (Reif, Ch. 13)

Mathematics is the language we use to describe and do Physics. Why this should be so is a topic for philosophical discussion, but for our purposes it is a fact of life. I will assume that you are comfortable with integral and differential calculus, partial derivatives, and elementary statistics and probability.

Evaluation: Your final grade in this course will be based on your work over the term, and calculated as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments (5)</td>
<td>25%</td>
</tr>
<tr>
<td>Midterm test</td>
<td>25%</td>
</tr>
<tr>
<td>Final examination</td>
<td>45%</td>
</tr>
<tr>
<td>Participation</td>
<td>5%</td>
</tr>
</tbody>
</table>

Assignments will be posted online approximately every other week. Paper versions will be made available on request. Assignments not submitted by the due date will be docked marks unless the instructor is provided with a documented medical or other valid excuse at the time the assignment is submitted.

The midterm test will be a one-hour written exam. It is tentatively scheduled for Wednesday, Feb. 27, during the normal class time (11:30-12:30), either in the normal lecture room (PAB 106) or nearby. The content and format of the test will be discussed in class.

The final exam will be a three-hour exam held during the April exam period. It will cover the entire course. The format of the exam will be discussed in class. The exam time will be posted on the course web site and announced in class when it becomes available. Students needing to make travel arrangements are advised to book a travel date after the end of the examination period. No makeup exams will be given to accommodate travel!

The midterm and final exam may involve some multiple-choice questions. Computer-marked multiple-choice tests and/or exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating.
The use of hand-held calculators during the test and exam is permitted (and in fact will likely be necessary). The use of cell phones, laptop computers, tablets, iPods, MP3 players, etc., or devices with networking capability is not permitted during tests and exams.

Frequently during the lectures, you will be expected to take part in small group discussions or problem-solving exercises with your classmates, to participate in classroom experiments or demonstrations, or to otherwise contribute actively to the course. Your participation grade will be based on the frequency and quality of your contributions.

Accommodations for Religious Holidays

When scheduling unavoidably conflicts with religious holidays which a) require an absence from the University or b) prohibit or require certain activities (i.e., activities that would make it impossible for the student to satisfy the academic requirements scheduled on the day(s) involved), no student will be penalized for absence because of religious reasons, and alternative means will be sought for satisfying the academic requirements involved. If a suitable arrangement cannot be worked out between the student and instructor involved, they should consult the appropriate department chair and, if necessary, the student's Dean.

It is the responsibility of such students to inform themselves concerning the work done in classes from which they are absent and to take appropriate action.

A student who, for either of the situations outlined in paragraph one above (a or b), is unable to write examinations and term tests on a Sabbath or Holy Day in a particular term shall give notice of this fact in writing to his or her Dean as early as possible, but not later than November 15 for mid-year examinations and March 1 for final examinations, i.e., approximately two weeks after the posting of the mid-year and final examination schedule respectively. In the case of mid-term tests, such notification is to be given in writing to the instructor within 48 hours of the announcement of the date of the mid-term test. If a Special Examination is offered as an alternative means to satisfy the academic requirements, the instructor(s) in the case of mid-term tests and the dean in the case of mid-year and Spring final examinations will arrange for special examination(s) to be written at another time. In the case of mid-year and Spring final examinations, the accommodation must occur no later than one month after the end of the examination period involved. It is mandatory that students seeking accommodations under this policy give notification before the deadlines and that the Faculty accommodate these requests.

For purposes of this policy the University has approved a list of dates which are recognized religious holidays which require members of those religions to be absent from the University; this list is updated annually and is available at Departmental, Deans' and Faculty advising offices.

Make-up Policy

If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or other supporting documentation to the Dean's office as soon as possible and contact your instructor immediately. It is the student's responsibility to make alternative arrangements with their instructor once the accommodation has been approved and the instructor has been informed. In the event of a missed final exam, a "Recommendation of Special Examination" form must be obtained from the Dean's Office immediately. For further information please see: http://www.uwo.ca/univsec/handbook/appeals/accommodation_medical.pdf
A student requiring academic accommodation due to illness should use the Student Medical Certificate when visiting an off-campus medical facility or request a Records Release Form (located in the Dean's Office) for visits to Student Health Services. The form can be found here: http://www.uwo.ca/univsec/handbook/appeals/medicalform.pdf

Unless the instructor is informed in advance, there will be no provision made for making up assignments or tests missed for reasons other than the above.

Support Services

Registrar’s Office: http://www.registrar.uwo.ca/
Western Student Services: https://studentservices.uwo.ca/secure/index.cfm
USC Student Support Services: http://westernusc.ca/services/

Students who are in emotional/mental distress should refer to Mental Health@Western http://www.uwo.ca/uwocom/mentalhealth/ for a complete list of options about how to obtain help.

Final Examination

In accordance with Senate Policy, a Special Examination will be held within thirty days of the regular final examination for students who are unable to write the regular examination for medical or other documented reasons. Requests for such a Special Examination must be made to the Associate Dean, Faculty of Science.

Note that if you fail to write a scheduled Special Examination, permission to write another Special Examination will be granted only with the permission of the Dean in exceptional circumstances and with appropriate supporting documents. In such a case, the date of this Special Examination normally will be the scheduled date for the final exam the next time the course is offered.

Cheating (Scholastic Offenses)

Scholastic offenses are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offense, at the following Web site: http://www.uwo.ca/univsec/handbook/appeals/scholastic_discipline_undergrad.pdf

Plagiarism

Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence (see Scholastic Offence Policy in the Western Academic Calendar).

I encourage students to work together on assignments, etc., but each student must write up their own assignment independently. If you have collaborated extensively with a colleague on an assignment, say so clearly on the submitted work. This will not be held against you, and is far better than being accused of copying!

Computer-marked multiple-choice tests and/or exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate
cheating.

**Classroom Conduct**

Disruptive behaviour will not be tolerated in class. Please respect the rights of your classmates to benefit from the lecture by limiting your conversations to those essential to the class. Students who persist in loud or rude behaviour will be asked to leave.

**Complaints and Suggestions**

If you have a concern about something, please let us know. We rely on your feedback. Please contact initially the person most directly concerned; this will usually be your instructor. If that is not satisfactory, or if there is something more general bothering you, talk it over with the Physics & Astronomy Department Chair or the Associate Chair of Undergraduate Studies (for contact information see [http://www.physics.uwo.ca](http://www.physics.uwo.ca)).
